Fable, Astra Extra, and Jev

Fable (Pipeline A)	not_run — Pipeline A. Anthropic batch assessment of a sealed copy.
Astra Extra (Pipeline B)	not_run — Pipeline B. Independent OpenAI replay of the same evidence bytes.
Jev	not_run — Typed router over Fable and Astra. Policy still vetoes the action.
Astra-live Extra assist	not_run — Capture UX assist on Pass B/C. Not Pipeline B and not inventory.

After seal, Fable and Astra replay run automatically on every AssetCopy. The inventory button is optional replay of the same sealed bytes. This survey has no sealed replay yet.

Limitations

-
- Physical copies and prices require operator review where evidence is incomplete.
 - Web prices are draft evidence until confirmed; eBooks and rentals are excluded.
 - Building figures use demo replacement-cost rates, not market sale value.
 - Model agreement is not independent ground truth.
 - After seal, Fable (A) and Astra replay (B) run on every AssetCopy independently. Jev scores A vs B and does not write count or price. Astra-live during Pass B/C is sampled assist metadata, not Pipeline B.
 - Invertis live model IDs (logs/llm_calls.json): Pipeline A claude-fable-5.1 (Fable role), Pipeline B gpt-6-astra, Jev jev-latest / jev-1.13.0. Code defaults are still FABLE_MODEL/ASTRA_MODEL/JEV_MODEL.
