Fable, Astra Extra, and Jev

Fable (Pipeline A)	ran — Pipeline A. Anthropic batch assessment of a sealed copy.
Astra Extra (Pipeline B)	ran — Pipeline B. Independent OpenAI replay of the same evidence bytes.
Jev	ran — Typed router over Fable and Astra. Policy still vetoes the action.
Astra-live Extra assist	ran — Capture UX assist on Pass B/C. Not Pipeline B and not inventory.

Limitations

- Physical copies and prices require operator review where evidence is incomplete.
- Web prices are draft evidence until confirmed; eBooks and rentals are excluded.
- Building figures use demo replacement-cost rates, not market sale value.
- Model agreement is not independent ground truth.
- After seal, Fable (A) and Astra replay (B) run on every AssetCopy independently. Jev scores A vs B and does not write count or price. Astra-live during Pass B/C is sampled assist metadata, not Pipeline B.
- Configured default model IDs are not a live confirmation of provider access.
